DEMO - SYNTHETIC DATA

CONCEPT PREVIEW

01 / PACKET MANIFEST

One SKU. A reviewable evidence trail.

A fictional import dossier prepared for broker discussion, with evidence versions and open questions kept visible.

FICTIONAL IMPORTER
Alder Import Co

SKU / PRIOR-ENTRY REFERENCE
HX-42 / EN-104

IMPORTER REVIEWER
Maya Chen

BROKER-REVIEW PERSONA
Noah Reed

DISCUSSION PACKET
Reviewed / exported

WHAT THE REVIEW MEANS

Noah Reed accepted packet completeness for discussion at 09:24 UTC on 2 October 2026. Classification remains nonbinding and unassigned. Origin preference eligibility is not assessed; this packet is not an entry filing.

INCLUDED EVIDENCE / ALL PRODUCT RECORDS ARE SYNTHETIC

Record / version	Purpose	Packet state
SPEC-HX42-v1 DRAW-HX42-v1	Product specification and component drawing	Facts require follow-up
INV-HW-104-v1 VAL-104-v1	Commercial invoice and valuation worksheet	Input not legally validated
PRIOR-EN104-v1	Historical entry reference	Comparison only
ORG-HX42-v1	Loaded supplier origin response	Reviewed; no preference claim
SCR-HX42-v1	Simulated identifier comparison	This match: false positive
REV-HX42-v1	Assumption and broker-review log	Open questions retained

REVIEWED HANDOFF / SCRIPTED FIXTURE SEQUENCE

Evidence versions
Keep facts and sources linked.

Human review
Record exceptions and reasons.

Discussion packet
Carry unresolved questions.

Illustrative only. No filing, official classification, clearance or system write.

DEMO - SYNTHETIC DATA

CONCEPT PREVIEW

02 / PRODUCT AND VALUATION EVIDENCE

Facts before assumptions.

Synthetic product facts and invoice amounts remain separate from legal conclusions.

Field	Fictional value / limitation	Evidence
Importer / supplier	Alder Import Co / Harborside Works	IMP-DEMO-01 SUP-DEMO-01
Product / quantity	HX-42, stainless fastener assembly / 1,000 units	SPEC-HX42-v1 INV-HW-104-v1
Construction	Threaded fastener with associated components. Full material, dimensions and intended use still required.	SPEC-HX42-v1 DRAW-HX42-v1
Lane / origin	Canada to US; geography alone proves no origin or preference.	LANE-DEMO-01 ORG-HX42-v1
Historical reference	EN-104 is fictional. A prior entry is a comparison input and is not presumed correct.	PRIOR-EN104-v1

COMMERCIAL INVOICE / INV-HW-104-V1 / 28 SEPTEMBER 2026

Line description	Units	Unit price	Amount
HX-42 stainless fastener assembly	1,000	$12.00	$12,000.00

Invoice line total $12,000.00

VALUATION WORKSHEET / VAL-104-V1

The $12,000 customs-value input is assumed and unvalidated. Invoice arithmetic is coherent; legal valuation treatment and required adjustments remain for broker/counsel review.

Freight is shown separately as a cost component. This is not a statement about its legal treatment for customs valuation.

NEXT FACTUAL QUESTIONS

Confirm all components, function as presented, materials, dimensions and intended use. Explain assists, related-party terms and possible adjustments before recording a legal valuation conclusion.

Illustrative only. No filing, official classification, clearance or system write.

DEMO - SYNTHETIC DATA

CONCEPT PREVIEW

03 / CLASSIFICATION ALTERNATIVES

Two rationales. Neither is a determination.

Candidates remain unassigned in this concept. The review preserves competing reasoning and the rejected assumption.

H-A

Component construction

Working hypothesis for discussion

BASIS

Assess the good as a threaded fastener based on construction.

SUPPORTING FIXTURE

SPEC-HX42-v1 and DRAW-HX42-v1 show a threaded fastener component.

MISSING FACTS

Full assembly function, all components and intended use need confirmation.

CODE FIELD

US HTS candidate A - unassigned in this concept.

H-B

Assembly as presented

Unsupported assumption rejected

BASIS

Assess the complete assembly based on its components and combined function.

UNSUPPORTED ASSUMPTION

The fixture does not establish that the assembly has a separate primary function.

REVIEWER RESPONSE

Noah Reed rejected this assumption at 09:20 UTC; the rationale stays in history.

CODE FIELD

US HTS candidate B - unassigned in this concept.

BROKER-REVIEW EVENT / REV-HX42-V1 / 09:20 UTC

Noah Reed selected H-A as a working hypothesis for packet discussion after rejecting the unsupported H-B assumption. Selection does not validate an HTS code or decide legal classification. Both alternatives remain reviewable.

OPEN CLASSIFICATION QUESTION

What are the complete product facts needed to assess the item as presented? Supply components, function, material, dimensions and use. The broker/counsel must identify and validate actual code candidates before a code-bearing dossier is used.

General guidance: CBP reasonable-care guidance and USITC classification FAQs inform the review process; neither source validates this fictional product or rationale. See the source register on page 6.

Illustrative only. No filing, official classification, clearance or system write.

DEMO - SYNTHETIC DATA

CONCEPT PREVIEW

04 / ORIGIN AND SCREENING REVIEW

Review the gap. Then record the reason.

Document review and match disposition are separate human decisions in this synthetic fixture.

ORIGIN RESPONSE / ORG-HX42-V1

Missing at intake; synthetic response loaded at 09:09 UTC

Maya Chen reviewed the response for the stated documentation purpose at 09:11 UTC on 2 October 2026. The record is versioned and linked to HX-42; the lane alone does not prove origin.

Preference eligibility: not assessed. No program-specific preference claim is made.

POTENTIAL HIT / SIMULATED LIST AS OF 1 OCTOBER 2026, 09:00 UTC

Identifier	Fictional supplier	Fictional simulated match
Name (fictional)	Harborside Works	Harborside Industrial Works
Registration ID	DEMO-HW-001	DEMO-HIW-091
Address (fictional)	41 Dock Lane Kingston, Ontario, Canada	905 Ironworks Road Hamilton, Ontario, Canada
Evidence	SUP-DEMO-01 / v1 SCR-HX42-v1	LIST-DEMO-01 / v1 SCR-HX42-v1

SIMULATED HUMAN DISPOSITION / 09:15 UTC

Maya Chen compared the full fixture and recorded: "The registration IDs differ and the address evidence conflicts. The similarly named simulated entity is distinct from this supplier in the supplied fixture."

Disposition: false positive for this match only. Not blanket clearance, not a finding about any real entity and not a legal sanctions determination.

WHAT STAYS OUTSIDE THIS DECISION

Official-list follow-up, scope of applicable restrictions, ownership information and unresolved identifier gaps require appropriate diligence. Insufficient identifiers keep a match unresolved; a reviewer cannot replace missing evidence with an approval badge.

General guidance: the ITA Consolidated Screening List is an aid, with relevant official-list checks required; OFAC FAQs 5 and 401 address match review and ownership context. Links on page 6 are general information only.

Illustrative only. No filing, official classification, clearance or system write.

DEMO - SYNTHETIC DATA

CONCEPT PREVIEW

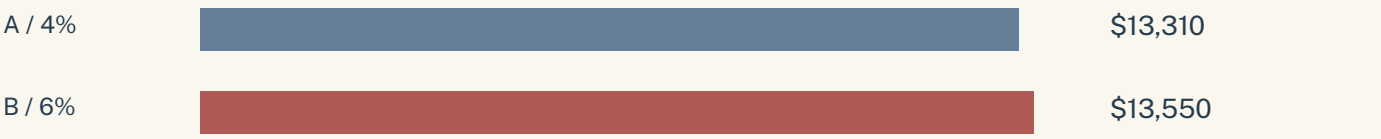
05 / CONDITIONAL COST SCENARIOS

Make the assumptions visible.

Invented duty rates illustrate sensitivity. They are not tied to actual HTS codes, a tariff feed or a promised saving.

Included component / 1,000 units	Scenario A	Scenario B
Goods / unvalidated customs-value input	$12,000.00	$12,000.00
Invented illustrative duty rate	4%	6%
Duty = goods x illustrative rate	$480.00	$720.00
Freight	$600.00	$600.00
Insurance	$80.00	$80.00
Broker fee	$150.00	$150.00
Included-components subtotal	$13,310.00	$13,550.00
Included subtotal per unit	$13.31	$13.55

INCLUDED SUBTOTAL / USD / ILLUSTRATIVE



$240 scenario difference

The difference is conditional arithmetic, not savings. Do not select a classification by whichever scenario costs less. Fixture tariff effective date: 1 October 2026; it is not a government feed date.

EXCLUDED OR UNASSESSED

MPF/HMF where applicable, additional tariffs, AD/CVD, other taxes or charges and required valuation adjustments are unassessed. Freight is a separate illustration line; legal valuation treatment is not decided here.

Evidence: INV-HW-104-v1, VAL-104-v1 and TAR-DEMO-01 / v1. Scenario reviewed 2 October 2026 at 09:17 UTC. A changed or stale fixture opens a review task and never rewrites an approved dossier automatically.

Illustrative only. No filing, official classification, clearance or system write.

DEMO - SYNTHETIC DATA

CONCEPT PREVIEW

06 / DECISION LOG AND SOURCES

The reasoning travels with the packet.

This local export records the scripted review path, source scope and remaining questions. No message or external write occurred.

UTC	Reviewer	Event / meaning	Evidence / version
09:11	Maya Chen	Origin response reviewed; eligibility not assessed.	ORG-HX42-v1
09:15	Maya Chen	Identifier evidence supports false positive for this simulated match only.	SCR-HX42-v1
09:20	Noah Reed	Reject unsupported H-B assumption; retain H-A for discussion with codes unassigned.	REV-HX42-v1
09:24	Noah Reed	Accept packet completeness for broker discussion; open questions retained.	DKT-HX42 / v1
09:25	Local export	Generate synthetic PDF fixture. No filing or system write.	DKT-HX42 / v1

SOURCE REGISTER / OFFICIAL GENERAL GUIDANCE, SEPARATE FROM FICTIONAL FACTS

01 / CBP Reasonable Care

2017 revision supplied in project research. Process guidance; no validation of HX-42.

https://www.cbp.gov/sites/default/files/assets/documents/2018-Mar/icprescare2017revision.pdf

02 / ITA Consolidated Screening List

Web guidance supplied in project research. Screening aid; relevant official-list checks remain necessary.

https://www.trade.gov/consolidated-screening-list

03 / OFAC Frequently Asked Question 5

Web reference supplied in project research. Match review; identifier diligence required.

https://ofac.treasury.gov/faqs/5

04 / OFAC Frequently Asked Question 401

Web reference supplied in project research. Ownership context; not a conclusion about the fixture.

https://ofac.treasury.gov/faqs/401

05 / USITC HTS Frequently Asked Questions

Web reference supplied in project research. Classification guidance; no binding code is assigned.

https://www.usitc.gov/harmonized_tariff_information/frequently_asked_questions

Open questions: complete product facts; actual HTS candidates; valuation adjustments; program-specific origin/preference eligibility; applicable extra duties/charges and relevant official screening coverage.

Version rule: reopening a decision creates v2 and invalidates the affected approval. v1 remains in history. DEMO product evidence and tariff/list fixtures are invented; official sources are general guidance, not evidence about the fictional parties.

Illustrative only. No filing, official classification, clearance or system write.
